

Wedding Tip: Table Names

Personalize your wedding day and make your guests feel special by offering them more than just an insignificant table number. Name your tables -

- *Places you have visited while dating*
- *Places you will visit during your honeymoon*
- *Popular honeymoon destinations - Poconos, Paris, Hawaii...*
- *Names of famous married couples*
- *Names of your favorite sporting teams*
- *Names of your favorite songs, albums, artists*
- *Names of your favorite movies, actors, stars*
- *City \ State \ Country names where guests have traveled from*
- *Romantic words - Love, Joy, Cherish, Serenity*

Whether you are assigning seats, reserving tables, or not, you can still name your tables. Your guests will have a sense of belonging, team spirit, and connection with everyone at their table. Group dynamics are improved, and your wedding will be that much more fun.

Photoshop tip: If you're familiar with Photoshop software, you can place your pictures \ faces into pictures of famous places you would like to visit, as if you had already been there - Hawaii, Paris France, the Hollywood sign, London Tower, Statue of Liberty...

If you must do numbers, use numbers with significance, and you can even make a game of it –

- *452=Number days you dated before the proposal*
- *2=Number of dates before your first kiss*
- *6=Number of pets*
- *2381=Bride's birth date*

Game idea: Using just the table numbers only, ask the guests to guess what their table number represents!
